

# NEW!

from the  
**University of California**  
Agriculture and Natural Resources

This new manual addresses essential topics for succeeding in a highly competitive marketplace.

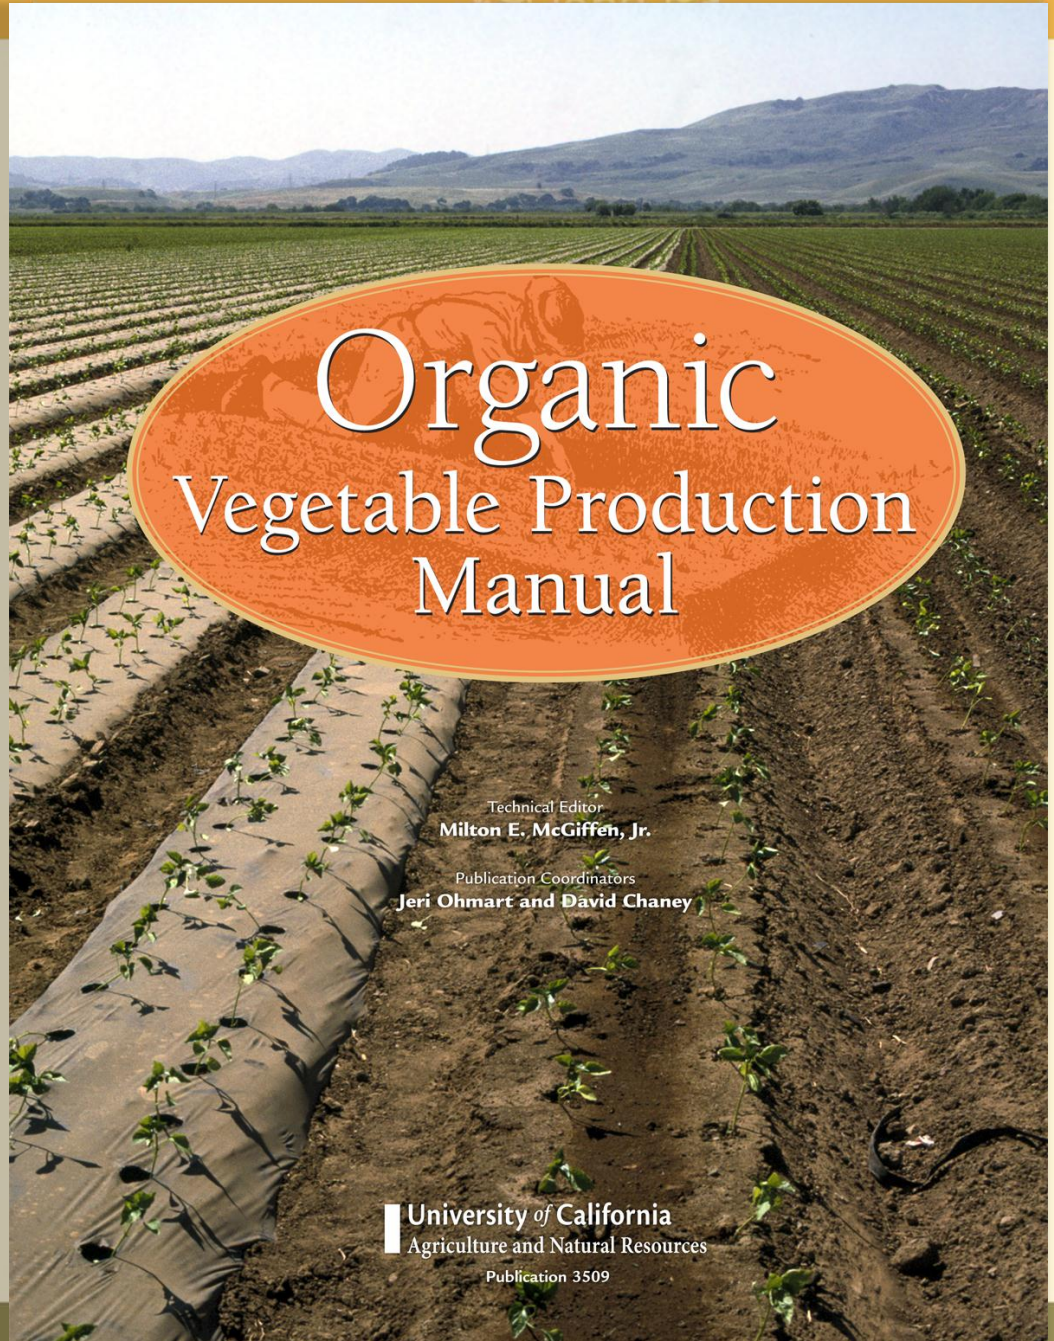

Chapters cover a range of topics for the organic vegetable farmer:

- Business and marketing
- Economic performance
- Soil fertility management
- Managing diseases
- Weed management
- Postharvest handling
- Organic certification and registration in California

This 86-page manual is illustrated with 35 color photographs and 21 tables.

This new book is a valuable resource for organic growers, and a must-read for growers considering organic practices.

2011 • #3509 • \$25
